

Abstract of the Disclosure

5 An assistant cutting tool for cutting vegetables, such as onions, the tool having a body with a semi-spherical inner space and a plurality of slits within the body so as to be traversed over the body to connect the inner space and the outside. A half cut onion is held in the inner surface and is cut by inserting a blade of a knife through the slits successively. After the onion is cut in one direction, it is then rotated by 90 degrees and then cut again in the same manner to obtain small pieces of onion. According to the tool, small dice-like onion pieces can be obtained.
